

What you need:

- empty boxes
- scissors
- perforator

How to make:

1. Eat the food.
2. Open the boxes.

3. Look for beautiful parts and cut them out of the box.

4. Cut the pieces which are less beautiful in cards, you can use them to write messages. They will not be blown by the wind easy on a beautiful summerday.

5. Use the cards for namecards (during a conference) with a cork or a pin. Put a small hole in the cards with a perforator and put them with a nice (recycled) ribbon on gifts and presents.

Tip: you can also use postcards or Christmas cards which are already send to you. Just look for special parts ... cut and perforate if necessary!
